TENRYU (THAILAND) CO., LTD.

Safety Data Sheet

R-100

Code: 01-003-0 Prepared By: TENRYU (THAILAND) Validation Date: 04-Jan-2021

1. Identification of the substance or mixture and of the supplier

Trade Name : R-100

Material Uses : Raw material for used in the rubber, textile and chemical process

industries, and in household products, surface coatings, printing inks,

cleaners, and pesticide and wood preservative formulations.

Supplier : TENRYU (THAILAND) Co., Ltd.

149/44 Moo 7, Bang Chalong Subdistrict, Bang Phli District,

Samut Prakan Province 10540

Tel: +66 2-0058388 Mobile: +66 64-789-1461

Fax: +66 2-0058389

Emergency Contact : +66 64-789-1461

2. Hazards Identification

GHS Classification : Aspiration hazard : Category 1

: Skin Corrosion/Irritation : Category 2

: STOT-SE : Category 3

: Chronic Aquatic Toxicity : Category 2

Signal Word : Danger

Health Hazard : Irritating to respiratory system. Vapours may cause drowsiness and

dizziness. Irritating to skin. Repeated exposure may cause skin dryness

or cracking.

Environmental Hazard : Toxic to aquatic organisms. May cause long-term adverse effects in the

aquatic environment.

GHS Pictogram

GHS Hazard Statements : H226 Flammable liquid and vapor

: H304 May be fatal if swallowed and enters airways

R-100 Page 2 of 8

: H315 Causes skin irritation

: H336 May cause drowsiness or dizziness

: H411 Toxic to aquatic life with long lasting effects

GHS Precautionary Statements

Prevention P201 Obtain special instructions before use.

P202 Do not handle until all safety precautions have been read and understood.

P281 Use personal protective equipment as required.

Response <u>If swallowed</u>

P301+P310 Immediately call a poison center or doctor/physician.

P331 Do not induce vomiting.

P308+P313 If exposed or concerned: Get medical advice/attention.

Storage P405 Store locked up.

Disposal P501 Disposal should be in accordance with applicable regional, national, and

local laws and regulations. Local regulations may be more stringent than

regional or national requirements and must be complied with.

Precautionary Pictograms

3. Composition/Information on Ingredients

Chemical Name : Solvent naphtha (Petroleum) light aromatic

Common Name : R-100

Synonyms Name : Shellsol A100 (Solvent 100)

UN No. : 1268

Chemical Name CAS No. EC Number Composition

Naphtha petroleum light aromatic solvent 64742-95-6 265-199-0 >99%

R-100 Page 3 of 8

4. First-Aid Measures

Inhalation : Remove to fresh air. If the victim has difficulty breathing or tightness of

the chest, give 100% oxygen with rescue breathing or CPR as required

and transport to the nearest medical facility.

Skin Contact : Remove contaminated clothing. Immediately flush skin with large

amounts water and follow by washing with soap if available.

Eye Contact : Immediately flush eyes with large amounts of water for at least 15

minutes while holding eyelids open. Transport to the nearest medical

facility for additional treatment.

Ingestion : Do not induce vomiting. If vomiting occurs spontaneously, keep head

below hips to prevent aspiration and transport to nearest medical

facility for additional treatment.

5. Fire-Fighting Measures

Suitable extinguishing media : Dry chemical powder, Alcohol-resistant foam and Carbon dioxide.

Specific hazard arising from

the chemical

May produce toxic fumes of carbon monoxide, carbon dioxide if

burning.

Special protective action for

fire-fighters

Keep adjacent containers cool by spraying with water.

Protective Equipment : Wear full protective clothing and self-contained breathing apparatus.

6. Accidental Release Measures

Protective Measures : • Observe all relevant local and international regulations.

• Avoid contact with spilled or released material. Immediately remove all contaminated clothing. For guidance on selection of personal protective equipment see chapter 8 this Material Safety Data Sheet. Shut off leaks, if possible without personal risks. Remove all possible sources of ignition in the surrounding area. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other

appropriate barriers.

• Take precautionary measures against static discharge. Ensure electrical continuity by bonding and grounding (earthing) all equipment.

Clean-Up Methods

Small spillage (< 200 LT) Transfer by mechanical means to a labeled, sealable container for product recovery or safe disposal. Allow residues to evaporate or soak up with an appropriate absorbent material and dispose of safely. Remove contaminated soil and dispose of safely.

Large spillage(> 200 LT)

Transfer by mechanical means such as vacuum truck to a salvage tank for recovery or safe disposal. Do not flush away residues with water. Retain as contaminated waste. Allow residues to evaporate or soak up

149/44 Moo 7, Bang Chalong Subdistrict, Bang Phli District, Samut Prakan Province 10540

R-100 Page 4 of 8

with an appropriate absorbent material and dispose of safely. Remove

contaminated soil and dispose of safely.

Other Information : Notify authorities if any exposure to the general public or the

environment occurs or is likely to occur. Vapors may form explosive mixtures with air. Vapors may travel to source of ignition and flash

back.

7. Handling And Storage

Handling : Avoid contact with skin, eyes, and clothing. Do not breathe vapours.

Extinguish any naked flame. Remove ignition sources. Avoid sparks. Do not smoke. The vapour is heavier than air spreads along the ground and distant ignition is possible. Ensure electrical continuity by bonding and grounding (earthing) all equipment. Do not use compressed air for filling, discharging, or handling operations. Handle and open container

with care in well-ventilated area. Do not empty into drains.

Storage : Must be stored in a diked (bonded) well-ventilated area, away from

sunlight, ignition sources and other sources of heat. Bulk storage tanks should be diked (bonded). Keep away from aerosols, flammables, oxidizing agents, corrosives. Storage Temperature: Ambient.

Product Transfer : Keep containers closed when not in use. Do not use compressed air for

filling, discharging, or handling operations. If positive displacement pumps are used, these must be fitted with a non-integral pressure relief valve. Ensure electrical continuity by bonding and grounding (earthing)

all equipment.

Recommended Materials : For containers, or container linings use mild steel, stainless steel.

Additional Advice : Containers even those that have been emptied, can contain explosive

vapours. Do not cut, drill, grind, weld or perform similar operations on

or near containers.

8. Exposure Controls and Personal Protection

Exposure Standard : Occupational Exposure Limits

Engineering Controls

Workplace

Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapours below their respective threshold

limit value.

Respiratory Protection : Vapor respirator. Be sure to use an approved/certified respirator or

equivalent. Wear appropriate respirator when ventilation is inadequate.

Hand Protection : Butyl rubber gloves, Nature rubber gloves, Neoprene rubber gloves,

Nitrile rubber gloves.

Eye Protection : Chemical splash goggles (chemical monogoggles).

R-100 Page 5 of 8

Other Protection : Use protective clothing which is chemical resistant to this material. Safety shoes and boots should also be chemical resistant.

9. Physical and Chemical Properties

Appearance : Clear liquid

Odour : Aromatic odour

pH Value : No data available

Boiling Point (°C) : 150 - 185 °C

Melting Point (°C) : No data available

Flash Point (Method close Cup) : 38 °C

Lower/Upper Flammability limits : 1.2 - 7.5 %V

Specific Gravity : 0.861 @ 15 °C (ASTM D4052)

Density (g/cm³) : 0.860 @ 15 °C (ASTM D4052)

Vapour Density : >1 @ 20 °C (air = 1)

Solubility in Water : Insoluble

Auto Ignition Temperature : 507 °C (945 ° F)

10. Stability and Reactivity

Chemical Reactivity : Stable under normal conditions.

Stability : Stable under normal conditions.

Hazardous Polymerisation : No.

Conditions to Avoid : Heat, flame, spark and other ignition sources.

Materials to Avoid : Strong oxidizing agents.

Hazardous Decomposition

Products

Thermal decomposition is highly dependent on conditions. Carbon monoxide, carbon dioxide and other organic compounds will be evolved when this material undergoes combustion or thermal or

oxidative degradation. May form explosive peroxides.

R-100 Page 6 of 8

11. Toxicological Information

Acute Toxicity

 $\begin{array}{lll} \bullet \ LD_{50} \ Acute \ oral \ toxicity & : & >2,000 \ mg/kg \ , \ (rat) \\ \bullet \ LD_{50} \ Acute \ dermal \ toxicity & : & >2,000 \ mg/kg \ , \ (rat) \\ \bullet \ LC_{50} \ Acute \ inhalation \ toxicity & : & >20 \ mg/l \ /4 \ hour \ , \ (rat) \\ \end{array}$

Skin Irritation : Irritating to skin. Prolonged/repeated contact may cause defatting

of the skin which can lead to dermatitis.

Eye Irritation : Irritating to eyes.

Respiratory Irritation : Inhalation of vapours or mists may cause irritation to the

respiratory system.

Carcinogenicity : No data available.

12. Ecological Information

Acute Toxicity

Mobility : Floats on water. Adsorbs to soil and low mobility.

Persistence / Degradability : Readily biodegradable.

Bio-accumulation : Has the potential to bioaccumulate.

13. Disposal Considerations

Material Disposal : Recover or recycle if possible. It is the responsibility of the waste

generator to determine the toxicity and physical properties of the material generated to determine the proper waste classifications and disposal methods in compliance with applicable regulations.

Container Disposal : Drain container thoroughly. After draining, vent in a safe place

away from sparks and fire. Refer to Section 7 before handling the product or containers. Residues may cause an explosion hazard. Do not puncture, cut or weld uncleaned drums. Send to drum

recovered or metal reclaimed.

Local Legislation : Disposal should be in accordance with applicable regional,

national, and local laws and regulations. Local regulations may be more stringent than regional or national requirements and must

be complied with.

14. Transport Information

Road/Rail Transport ADR/RID

• UN. Number : 1268

• Class/Item : 3

• Hazard Symbol : Flammable Liquid

Proper Shipping Name : Petroleum Distillates, N.O.S.

• Packing Group : III

Maritime Transport IMO

• UN. Number : 1268

• Class : 3

• Packing Group : III

• Hazard Symbol : Flammable Liquid

• Proper Shipping Name : Petroleum Distillates, N.O.S.

Marine Pollutant : No

Air Transport IATA/ICAO

• UN. Number : 1268

• Class : 3

Packing Group : III

Hazard Symbol : Flammable Liquid

Proper Shipping Name : Petroleum Distillates, N.O.S.

15. Regulatory Information

EC Label Name : Solvent naphtha (Petroleum) light aromatic

EC Classification : Flammable, Harmful, Dangerous for the environment

EINECS (EC) : 265-199-0

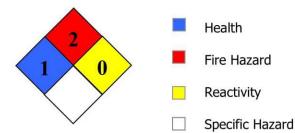

MITI (Japan) : 649-356-00-4

149/44 Moo 7, Bang Chalong Subdistrict, Bang Phli District, Samut Prakan Province 10540
