

HRJ-F100

Quantitative Immunoassay Analyzer

■ HRJ-F100 Quantitative Immunoassay Analyzer is an advanced POCT analyzer, intended to deliver accurate testing results rapidly.

■ Application

HRJ-F100 is an essential analyzer for Emergency Department, ICU, NICU, Cardiovascular Department or anywhere treatment and research needs at the point of care.

■ Specification

Weight
4kg

Work temperature
10~30°C

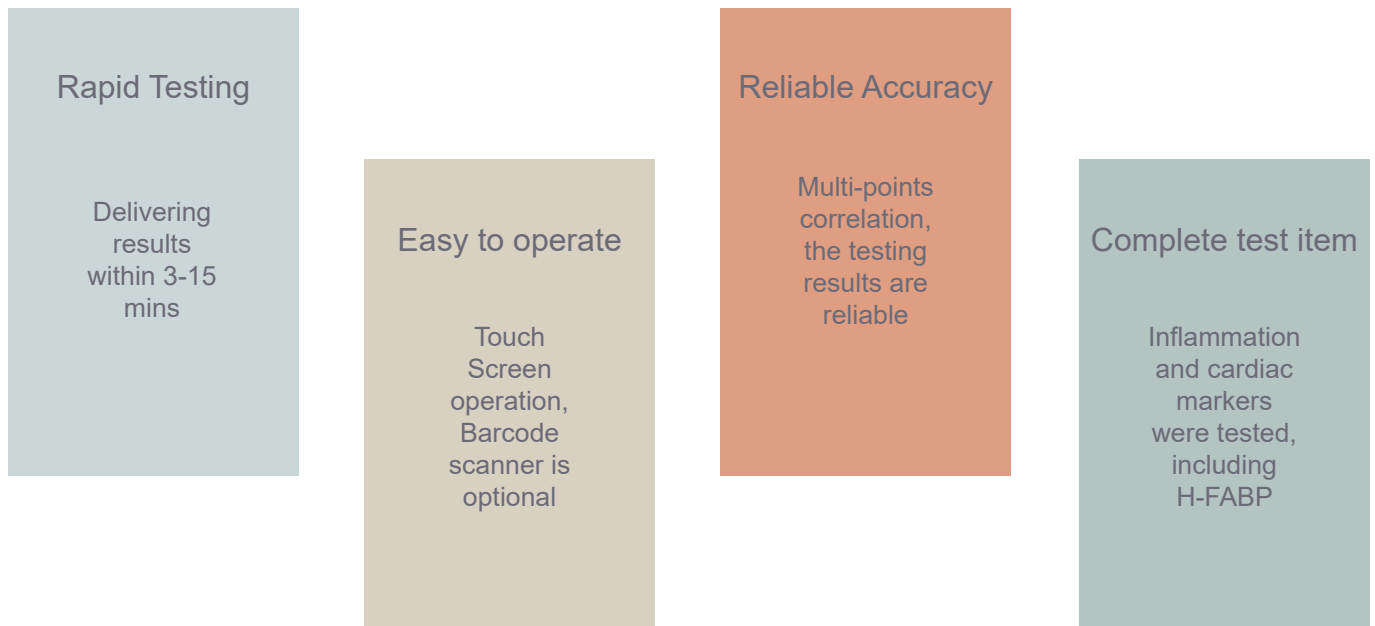

Interface
5" touch screen
Built-in thermal printer
USB port / Ethernet
LIS/HIS compatible

Memory
50,000 results

Power supply
100-240V AC, 50~60 Hz

Dimension
280mm(L)*260mm(W)*140mm(H)

Advantages

Testing Menu
